USB Gigabit Ethernet Adapter

The Traveler's Series

USB Ethernet Gigabit Adapter

The USB Ethernet Gigabit adapter is designed for people on the move who need internet connectivity through their USB port in diverse environments. The USB Ethernet adapter provides connectivity for 10 Mbps, 100 Mbps, and Gigabit networks. The adapter will automatically negotiate the network's best speed allowing you to quickly do the work you need. (Your actual speed will depend on the USB implementation on the host device and other traffic on the USB bus.) Simply install the drivers and connect the unit to your USB device and an Ethernet port and you are ready to connect to the Internet.

The USB Ethernet adapters works with any USB 1.0, 1.1 or 2.0 equipped device with the appropriate OS. Our adapter supports all Windows Operating Systems up through Win 7, and also Windows mobile environments including CE5.0, Windows Mobile® 5.0, and Windows Mobile 6.0 making it one of the most versatile USB Ethernet adapters on the market.

Powered by the USB port, the USB Ethernet adapter is a low power device. The easy to read LED lights let you know when you are connected and the speed of the network being negotiated. The USB Gigabit Ethernet adapter provides you reassurance that you can connect your laptop or handheld computer during some of the most challenging conditions.

FEATURES

- Support for 10Mpbs, 100Mbps and Gigabit networks
- Auto-negotiation for best possible network speed
- Full duplex support
- USB bus powered
- Low power consumption
- LED Status light

Orange/Green:	10Mbps
Orange:	100Mbps
Green:	1 Gigabit/s

- OS Supported
  - Windows XP, Vista, 7
  - Microsoft CE
  - Windows Mobile 5.0 and 6.0
- Power Requirements
  - Operating Voltage 5V DC
  - Operation Mode 450 mA(Max)
- Dimensions: 79x56x21 mm
- Weight: 60 g
- EMC Certification
  - FCC
  - CE
  - VCCI
